

XCHANGEtm

Currency Exchange Digital Signage

Introduction

The days of using Static LED Display Boards are behind us. With the introduction of LCD and Plasma Monitors, information display no longer need to be represented in a dot matrix format, but in a more versatile and visually captivating manner.

XCHANGE offers a new and dynamic way of representing CURRENCY RATES using these new display technologies rather than in an outdated and visually unappealing LED technology.

Existing LED CURRENCY RATE BOARDS have several constrains on:

- Font Formats
- Number of rows
- Colors
- Hardware customisations
- Installations

XCHANGE Overview

XCHANGE provides a better alternative for traditional LED Currency Exchange Boards and comparable in cost too.

Hotels, Banks, Money Changers in particular will welcome the exciting interfaces that **XChange Display** can bring about and the ease of managing the daily currency rates through **XChange Administrator**.

XChange Software comes with an Administration and Display Application. You can use exchange on a single stand-alone machine or a networked Administrator and Display computers.

XChange Administrator lets you administrate different currencies and also the rates of the currencies. Features include:

- Administration of the Currency
- Auto Insertion of Country Flags
- Unlimited Currency Addition
- Banner Administration
- Ticker Text Administration

The interface is easy to use and step by step basis.
